CORE COMPETENCIES IN INFECTIOUS DISEASES IN THORACIC
TRANSPLANTATION AND MECHANICAL CIRCULATORY SUPPORT

Tuesday, April 4, 2017

Scientific Program Committee
Chair: Martha Mooney, MD, FACP, Sentara Norfolk Transplant Center/Eastern Virginia Medical School, Norfolk, VA, USA
Co-Chair: Shahid Husain, MD, MS, University Health Network, Toronto, ON, Canada
Members: Michele Estabrook, MD, St. Louis Children’s Hospital, St. Louis, MO, USA
Robin Avery, MD, Johns Hopkins University, Baltimore, MD, USA
Kate Gould, FRCPath, NUTH NHS Foundation Trust, Newcastle Upon Tyne, United Kingdom
Orla Morrissey, MD, The Alfred Hospital, Melbourne, Australia

Target Audience
While all members are invited to enroll, this course is primarily designed to be of benefit for clinicians and allied professionals who are in the early stages of their careers or who are in training and/or are part of a new program or desire an update on the current state of the field. The information presented covers core competencies and is intended to provide a strong foundation of the overarching principles of infectious disease concerns in cardiothoracic transplantation and mechanical circulatory support, rather than as a detailed update for those who are already proficient experts in the field.

Learning Objectives
At the conclusion of this meeting, participants will have improved competence and professional performance in their ability to:

- Explain how to utilize pre-transplant evaluation and screening of the cardiothoracic transplant recipient and donor to minimize the risk of infections in cardiothoracic transplant and MCS recipients
- Describe how to control and prevent infection in cardiothoracic transplantation and MCS recipients
- Identify clinical infections and how to use diagnostic methodology for the detection of bacterial, fungal, viral, and parasitic infectious diseases
- Discuss the pharmacology of anti-infective agents in cardiothoracic transplant and MCS recipients.
